

# **CWCT AGM and Members' Meeting**

***Tuesday 10 October 2017***

Central London

## ***Pushing the envelope – meeting future challenges***

What requirements will be placed on our building envelopes as we look to the future? How will these challenges be met?

The future offers endless potential for innovation and opportunity. There will also be many challenges, both of a technical and process nature that will have to be solved as we ask more of our facades.

Refurbishment has been in the news recently for all the wrong reasons. It remains a significant challenge that must be faced for buildings to remain fit for purpose and to meet legally binding energy reduction targets.

Ultimately we must not forget that the most important people in the whole process are those who live and work in our buildings. How can we look beyond our traditional performance metrics to ensure we create buildings with facades that provide the occupants with the conditions that they need for comfort and satisfaction?

The day will begin with a short AGM, and close with a discussion session.
